

CLINICAL "SNIPPETS"

A manikin based observational study on CPR skills at the Osaka Senri medical Rally

Masanao Kobayashi, Akiri Fujiwara, Hiroshi Morita et al

Resuscitation (2008) 78, 333 - 330

Overview: Examination of the current status of CPR skills in Japan as demonstrated at the Osaka Senri medical rallies in 2006 and 2007.

Conclusions: Significant differences in performance between the AHA and ERC methods were observed. In terms of application, the ERC guidelines were more rational and suitable than the AHA guidelines.
