

CLINICAL "SNIPPETS"

Rescue breathing is still a part of basic life support]

Krarup NH, Løfgren B.

Hjertemedicinsk Afdeling B, Aarhus Universitetshospital, Denmark.

Ugeskr Laeger. 2009 Nov 23;171(48):3531-5.

Overview: This paper studies of Hands-only (compression only) CPR are reviewed.

Conclusions: Currently, the evidence is insufficient to herald immediate changes to CPR guidelines.
