Awareness of BLS (CPR) among medical students: status and requirements.

Zaheer H, Haque Z.
Jinnah Medical & Dental College (JMDC), Karachi.

J Pak Med Assoc. 2009 Jan;59(1):57-9.

Overview: This study established the awareness on Basic Life Support (BLS) (CPR) in undergraduate medical students.

Conclusions: Most of the medical students although they had not attended a BLS course, had some knowledge about BLS. Inclusion of this course in the undergraduate curriculum will increase awareness and application of this valuable life saving maneuver.
