Delay prior to calling 911 is associated with increased mortality in out-of-hospital cardiac arrest

Swor, R.A., Compton, S., Domeier, R., Harmon, N., Chu, K.

Prehospital Emergency Care 2008:12:333-338

Overview: An assessment of whether delay in calling 911 is associated in increased mortality in out-of-hospital cardiac arrest.

Conclusions: Pre-hospital delay is common in out-of-hospital cardiac arrest and is associated with increased mortality.
