

CLINICAL "SNIPPETS"

Evaluation of staff's retention of ACLS and BLS Skills

Kimberly K. Smith, Darlene Gilcreast, Karen Pierce

Resuscitation (2008) 78. 59 – 65

Overview: This was an evaluation of nurses' abilities to retain ACLS or BLS psychomotor skills and theory.

Conclusions: A decline in skill retention meant that the nurses could not perform ACLS and BLS skills to standard for the entire certification period.
