

CLINICAL "SNIPPETS"

The time cost of pre-hospital intubation and I.V. access in trauma patients

Carr, B.G., Brachet, T., David, G., Duseja, R., Branas C.C.

Prehospital Emergency Care 2008:12:327-332

Overview: An estimation of the time spent on scene performing intubation and I.V. access.

Conclusions: There is a marginal increase in on-scene duration for the performance of endotracheal intubation and I.V. access.
